

# A NEW LÄNNEN MACHINE FOR TH

**Lännen Tractors Oy presents a large, articulated machine weighing about 9.5 tonnes for the maintenance of properties. The machine was first introduced at the opening of the Lännen Center in Espoo, and in spring it will be presented at several shows and exhibitions.**

**The versatile Lännen Wheel Loader Backhoe was already equipped for property maintenance and similar works before, but the new configuration now comprises solutions that are even more versatile and unique when it comes to coupling of work attachments, and other properties**

**'It's also worth remembering the unrivalled usability of the Lännen machine for different tasks throughout its entire life cycle.**

**It is not at all unusual, after a few years' use, for a Lännen Wheel Loader Backhoe to be equipped for, for example, power-line construction work.'**

**important from the point view of using different work attachments.**

**"This concept has been specially developed for property maintenance, and it enables practically the same work attachments to be connected to the rear of the machine as to the front. This is a versatile, agile and robust machine, suited to large work attachments and therefore ideal for big real estate projects, says Mr. Jan Aspvik, product manager at Lännen Tractors.**

**"When you need a lifting capacity of 6 tonnes both in front and**

# THE MAINTENANCE OF PROPERTIES

*behind, as well as a high flow of hydraulic oil for the work attachments, the Lännen is a strong candidate for your property maintenance machine.*

*Excellent controllability of the work and the drive hydraulics broadens the machine's scope of application for a wide range of tasks.*

*And should demand for its services change for some reason, the Lännen property maintenance machine can easily be re-equipped accordingly. The basic construction of the Lännen Wheel Loader Backhoe in-*

*corporates a backhoe that can be rapidly disconnected. This means that the Lännen property maintenance machine can easily be converted for excavation works later by separately acquiring a backhoe.*

*It's also worth remembering the unrivalled usability of the Lännen machine for different tasks throughout its entire life cycle. It is not at all unusual, after a few years' use, for a Lännen Wheel Loader Backhoe to be equipped for, for example, power-line construction work," points out Mr. Aspvik.*

*The Lännen Lundberg product range covers every weight category from 4 to 7 tonnes, so the Lännen property maintenance machine successfully extends this range to around 9.5 tonnes.*

*This means that Lännen property maintenance machines are therefore able to cover an even wider range of tasks all year round.*
